

# Edval Testimonials

Since adopting **Edval**, Danebank has enjoyed a significantly better timetable solution, and found the process extremely easy. Edval was able to improve almost every aspect, with great rooming, class spreads and more. Our school has many part time staff and other difficult requirements, yet Edval was able to deliver an outstanding result. The software, service and solutions are excellent, and I would happily recommend Edval to any other school. **Warwick Fogden, Deputy Principal, Danebank An Anglican School For Girls, NSW**

I have just looked through the timetable - words cannot describe!!! Your program is BRILLIANT and you have just made my YEAR! I would be very happy to provide a reference to anyone on Edval! **Cathy Woodhead, IT Manager, Tangara School for Girls, NSW**

I am amazed. Our new timetabler had no previous timetabling experience and had to learn a new program and produce a timetable within 4 weeks. She achieved a fantastic result with Edval. No other product could be as easy to learn. **Amanda Parslow, Director of Curriculum, Tenison Woods College, SA**

# edval : Timetabling for 21st Century Schools

## The Knowledge

Edval provides a new approach to timetabling. We start by capturing all the invaluable knowledge that too often is held only in the head of the school timetabler. This knowledge captures *all* the possibilities for your school, not simply the ones that work on the current timetable.

Edval doesn't just know who is teaching a particular class this year, but every teacher in the school who has the skills to teach that class *and* every teacher who could teach the class if absolutely necessary. This is done through teacher-sets and provides you with the best possible solution. Our powerful algorithms can work through teacher swaps without the need for further input from you.

This approach is also used for rooming giving optimal solutions all around

Edval can produce a timetable for your school *within days* or you can choose to create your own with the many tools at your disposal.

## Features

Edval has many automated functions (full manual control is also supported):

- Solves clashes (teachers, rooms, and classes)
- Class spread optimiser: considers 15 components of spread quality to improve spreads
- Staffing optimiser
- Rooming: greater consistency, better balance, more efficient use of specialist areas
- Exam scheduling: create compact exam timetables within minutes for a complex school
- Yard duty rosters — created in seconds

Edval can save you time and money:

- Elective line construction second to none. Preference based electives, and cost reductions via auto-dropped classes
- Advanced reporting and analysis tools.
- Intuitive and easy to master with minimal training.

## Additional Modules

### WebChoice

Online student preference capture: students enter elective choices via the web by a specific date, according to rules and a pattern determined by the school. Preference data is available online to administrators at any time and can be downloaded directly to Edval.

### EdvalDaily

Day to day school organiser: manage your absent teachers within seconds, cover excursions, merge classes (saving the cost of a cover teacher). EdvalDaily will also set up your exam timetable and organise the supervision roster, room swaps etc.

### EdvalWhereis

Find rooms, teachers, students on any given day at any particular time. EdvalWhereis communicates with both EdvalDaily and Edval so daily changes are visible, not simply fixed timetables. Multi-user room bookings and class list management also included.
